

SUSTAINABILITY

Environment

FOR A BETTER WORLD

- Our vision is a sustainable society where future generations will have the same opportunities as we have today. To achieve this goal, our mission is to encourage sustainable consumerism.

SUSTAINABILITY

Environment

We contribute to the UN Sustainable Development Goals by influencing the furniture and interior sector to take environmental and social responsibility, by being a good employer, a responsible regional actor, and by helping our customers to become more sustainable by choosing a responsible alternative.

Our main objectives for sustainability

- We will ensure that our values and social and environmental principles are recognised and deeply rooted in our day-to-day operations.
- We will ensure that we have a socially and environmentally sound and responsible supply chain.
- We will increase the share of sustainable wood raw materials in our products and support sustainable forestry.
- We will reduce the environmental impact of our products and services

We, as part of Lammhults Design Group, have since 2014 been committed to the UN Global Compact corporate responsibility initiative and its principles in the areas of human rights, labour, the environment and anti-corruption.
